

Ventura Park – Math Corner

The Right Angle to Success

Looking for ways to engage your child in mathematics at home? Check out the *Harcourt School Math Glossary*.

The online glossary provides multimedia representations of math concepts accompanied by concise and student friendly definitions. It even has the capability to read the words to you by clicking on a small speaker.

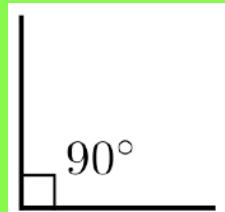

The math glossary can also be sorted by grade. Have fun with it by getting your child to investigate words or concepts that they want to learn more about!

Speaker to click on that will read the words.

How to search words by grade.

The screenshot shows a web page for the Harcourt School Publishers Multimedia Math Glossary. At the top, there are navigation links for "SEARCH", "HOME", and a grade level selector showing "K 1 2 3 4 5 6". Below the navigation is a grid of letters from A to Z, with "Tables" listed separately. The main content area displays the definition of the word "addition". The word is highlighted in blue, and the definition follows: "The process of finding the total number of items when two or more groups of items are joined; the opposite operation of [subtraction](#)". Below the definition is an "Example:" section showing a visual representation of three red blocks and two blue blocks, followed by the equation $3 + 2 = 5$. On the left side of the page, there is a sidebar for "Grade 3" with a list of terms: acute angle, acute triangle, addend, addition, A.M., angle, area, and array. The term "array" is circled with a green circle and has a speaker icon next to it, indicating it can be clicked to hear the word read aloud. A large green box at the bottom left of the page states "Glossary terms sorted alphabetically.".
