Centre**

The Robots are here!

Schwartz/Reisman has partnered with Holland Bloorview Kids Rehabilitation Hospital to offer a unique, inclusive, and interactive program to introduce children 6-10 with special needs (including learning disabilities, autism spectrum disorder and ADHD) to robotics and technology.

Build Robots!

LEARN ABOUT SCIENCE, TECHNOLOGY, ENGINEERING AND MATH

The Discovery Club will provide children the opportunity to foster their creativity as they discover various tools and techniques while making STEM-based projects (Science, Technology, Engineering and Math). **This program is designed to engage and motivate children's' interest and learning science- and engineering-related subjects, using motorized LEGO models and simple programming.**

Children between 6 and 10 years old with different abilities and special needs (including learning disabilities, autism spectrum disorder and ADHD) are welcome. The ideal participant for this group has a well developed verbal language system and can attend in group instruction settings.
